DELAWARE, USA and LONDON, UK – August 30, 2023 / (PRLog) – EIG Global Trust, following years of development in consultation with international stakeholders and central banking institutions, today historically announced the introduction of their 100% fully collateralized and backed high value economy leading crypto stable coin, the EIG Bank Coin. Collateralization has been carried out employing a range of traditional real-world hard assets such as precious metals including gold, platinum, silver, rare earth minerals, and on demand cash equivalents. The EIG Bank Coin is pegged to the US Dollar and has a per coin value of \$1,000,000.00 (One Million US Dollars).

EIG Global Trust is a close partnership of recognized industry leaders with decades of experience in historical best of breed: worldwide banking policy; financial intelligence; fraud intervention; law enforcement and distributed enterprise level secure digital hardware, firmware, and software setting and deploying mission critical standards for over thirty years. EIG principals have supported the numerous financial and physical security requirements of confidential central banking and commercial banking communities, and their policy and regulatory relationships to their host country's electronic banking transaction and settlement commerce.

Borne of this unique history, EIG Global Trust recognized the widely known challenges and opportunities in stabilizing the economic growth plans of developing countries and established economies in a fashion that would most benefit the citizens at all economic levels in countries highly diversified societies. Thus, a unique model was created to meet the political and economic challenges of the 21st century employing the power and trust of the international community of nations. Ever since digital currencies were made a reality due to the invention of blockchain technology in 2008, the real requirements of transforming a nation's economy from a traditional fiat-based model to a fully trusted and 100% hard asset collateralized efficient digital currency has been the goal of visionary nations and their peoples. This goal is now a reality.

With the 100% of equivalent value fully certified backing of the EIG Bank Coin, EIG is providing digital capital initially in the value of three hundred billion USD equivalent digital investments into countries and their citizens to fund a myriad of humanitarian infrastructure and commerce projects to grow nations' economies for the betterment of their citizens. Within the next twelve months this investment into nations in all regions across the planet will grow exponentially into a multi-trillion US dollar equivalent portfolio enabling the digital transformation of commerce across all levels of nation's economies.

EIG Global Trust developed a model to assist governments, central banks, and international non-government financial institutions to ensure investments into a digital economy were going to meet an auditing standard to stabilize a nation's digital currency and monetary policy. This required a 100% fully backed high value digital stable coin to serve as a root digital currency to establish a standard to support all

other cryptocurrencies deployed in a nation's economy and meet cross-border interoperability demands in commerce. This process was the key to quickly generating trust of commercial transactions of high value as well as support for all means of digital commerce to the most basic level of retail transactions for all facets of the digital transformation rather than assorted single channel pilot experiments prevalent in the international community.

Large scale humanitarian projects meeting nations goals and aspirations for their people's benefit are now fully funded by EIG Bank Coin digital currency and reduce client nation's debt profiles. For the first time nations have a partnership reducing national debt with a fully backed trusted digital currency that will expand economies, yet curb inflationary pressures historically connected to fiat currencies.

EIG's work with governments and their central banks assisting them with the implementation of their digital currency transformation initiatives culminated in the introduction of the EIG Bank Coin. EIG Global Trust believes this innovative solution will be the most effective standard root cross border Central Bank Digital Currency ("CBDC"). The response from governments and central banks to EIG Global Trust's innovative model has been broadly significant and the consensus is the world is ready to adopt the digital commerce revolution.

The EIG Bank Coin will also spur socio-economic benefits in country at grass roots level by:

- Supplying a digital alternative to cash thereby enabling easier access to financial services and the digital economy.
- Massively supplying access to digital currency, particularly in developing nations, where traditional banking services and physical outlets have limited availability, particularly in rural areas. Due to the widespread distribution of wireless personal communications technology in developing nations citizens already have a personal electronic means to store crypto wallets and replace traditional fiat currencies.
- A secure fully backed vehicle to support a host country's entire digital ecosystem.

EIG has already gained formal agreement with several Central Banks that the EIG Bank Coin will itself be adopted as their Digital Currency with the objective of leading their transformation from fiat to digital. In addition, the EIG Bank Coin will be used to underpin their separate digital currencies either established or in planning stages to release. The positive implications for the EIG Global Trust banking architecture vis-à-vis Central Banks is designed to meet the enormous demand for country's humanitarian development projects and general well-being, reduce their national debt, significantly reduce the fraud and lack of accountability of fiat economies, improve a nation's balance sheets, and stabilize monetary policy for the growth and betterment of a nation's citizens at every level.

A limited time private initial direct sale of EIG Bank Coins has commenced through access to www.eigglobaltrust.com. This allows interested qualified parties to seek investment into the world's largest fully backed digital currency growth initiative. Starting at a minimum of \$100,000 USD equivalent, institutional, commercial and private investors can purchase EIG Bank Coins with recognized crypto currencies (Bitcoin, Ethereum, USDT and USDC), and fiat currencies (USD, Euros, and British Pound Sterling). This private initial direct sale is designed to prepare proper parties to partner in a digital investment arena on a commercial basis for the initial roll out of the EIG Bank Coin to nations' already on the establishment path with EIG Global Trust to transform their economies.
